

Profile

Computer Science Engineering graduate skilled in Python, SQL, and data processing. Experienced in building AI-driven applications and working with structured datasets through projects and internships. Strong in problem-solving, analytical thinking, and applying technical concepts to real-world solutions.

Skills & Languages

Programming & Technical Skills: Python, SQL, Data Analysis, Machine Learning, NLP (Basic), Statistical Analysis, RAG
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
Tools & Platforms: GitHub, Jupyter Notebook, Google Colab, PyCharm, Render, Vercel, Streamlit Cloud
Soft Skills: Problem-solving, Communication, Teamwork, Critical Thinking, Adaptability
Languages: Tamil | English

Projects

DataForge AI – Data Science Automation Platform [Live Link](#)

- Developed a Python-based system for data analysis, preprocessing, and automated machine learning model generation using Pandas and Scikit-learn.
- Built a data diagnosis module to detect missing values, duplicates, and outliers, improving dataset quality and consistency.
- Applied Decision Tree and Random Forest models and evaluated performance using visualization techniques for better insights.

Deepfake Guard – AI Based Deepfake Detection System [Live Link](#)

- Developed deep learning models using EfficientNet and DistilBERT to detect manipulated images and AI-generated text.
- Performed data preprocessing, feature extraction, and model training to improve detection accuracy.
- Evaluated model performance using standard metrics and built an inference pipeline for real-time predictions.

RAG System – Intelligence Nexus [Live Link](#)

- Developed a Retrieval-Augmented Generation (RAG) system to enable natural language queries over project data and workflows.
- Built a semantic search pipeline using Hugging Face embeddings and FAISS for efficient information retrieval.
- Integrated LLM-based response generation with retrieval to provide accurate, context-aware answers with reduced hallucination.

SkillMatch AI – Resume & JD Matching System [Live Link](#)

- Developed a Streamlit-based application to compare resumes with job descriptions and generate similarity scores.
- Applied NLP techniques including text preprocessing and cosine similarity to identify matching and missing skills.
- Processed and visualized data using Pandas, NumPy, and Plotly to provide clear insights on skill gaps.

Internship Experience

Data Science Intern – Vcodez 05/2025 – 07/2025

- Performed data preprocessing, cleaning, and exploratory analysis using Python and structured datasets.
- Assisted in model evaluation and data transformation tasks for analytics workflows.

Data Analytics & Engineering Intern – SpydX Technologies (Virtual) 09/2025 – 12/2025

- Worked on dataset preparation, reporting, and workflow documentation in a collaborative environment.
- Supported data handling and analysis tasks using Python and SQL.

Education

B.E – Computer Science Engineering 2022 – 2026
Karpaga Vinayaga College of Engineering and Technology Chengalpattu
Percentage: 76%

Certifications

- IBM Data Analyst – Coursera (IBM)
- Microsoft Power BI Data Analyst – Coursera (Microsoft)
- Data Analytics Essential – CISCO
